

# POWERED SUBWOOFER KITS

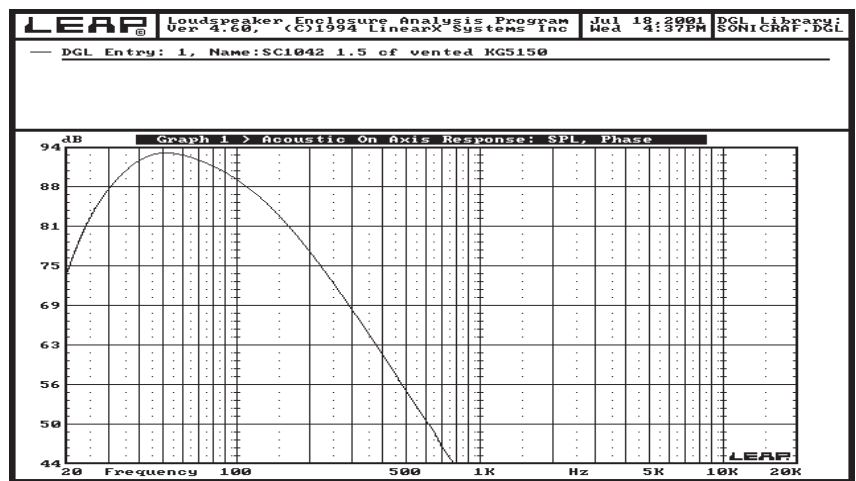

Madisound has taken advantage of KT Sonicraft's exceptional subwoofer design to produce Do-It-Yourself Sub Kits with simple assembly and top quality components. The long excursion and rigid construction of the Sonicraft drivers combined with the clean power of the Keiga amplifier make for an attractive and versatile design. The cabinets are compact for easy room placement and suitable for home hi-fidelity or for home theater applications. Despite the small box size the low resonance of these subwoofers will allow for clean reproduction of movie soundtrack transients down to 25Hz. The cabinets are professionally finished with solid rounded oak corners, completely assembled, and are already cut and vented. Front baffles are 1" thick, all other sides 3/4". The cabinet comes with a black grill. Your choice of clear or black lacquered oak veneer. (Clear finish shown below). The graphs shown are simulated frequency responses. Actual frequency response will vary depending on the dimensions of the listening environment.

## SC10 Powered Subwoofer Kit

Price Each \$393.00 (w/o cabinet \$253.00)

18" deep x 16" tall x 14" wide

## SC12 & NHT1259 Powered Subwoofer Kits
